

TORY CHIEF GIRDING FOR BIG BATTLE

Col. F. G. Taylor Hopes to Carry Manitoba Conservatives Into Power

WINNIPEG, Man., May 14.—Thirty years ago two young men were beginning legal careers in the thriving Manitoba town of Portage la Prairie. Today one of them is leader of the Government party in the Senate of Canada, a former prime minister, and a member of the Imperial Privy Council. The other is beginning an election campaign which he hopes will make him prime minister of Manitoba.

The first man is Rt. Hon. Arthur Meighen. The other is Lieut-Col. Fawcett Gordon Taylor, leader of the Conservative party in the Manitoba legislature. Citizens of Manitoba will decide in June whether the second of them is the province's foremost political aspirant to the office.

HARD FIGHTER. Col. Taylor is a stout man physically and a hard fighter. With a strong organization and plans laid for an extended campaign, he hopes to carry the Conservative Party into power in Manitoba for the first time since its crushing defeat in 1915. To do this he must out the government of Premier John Bracken. The government is Progressive, but in the coming campaign it has broken the ties of the official party.

Soldier, lawyer and politician, Col. Taylor has been a prominent figure in Manitoba for many years. One of the early days of Mr. Meighen's political career Col. Taylor was one of the future prime minister's most trusted lieutenants. Together to keep the constituency together to bring the Conservative Party to power in the province. Mr. Meighen entered the House of Commons, but Col. Taylor entered municipal politics.

SERVED IN FRANCE. He was elected mayor of the city in 1916 and held office until 1919 when he resigned to fight for overseas. He served in France with the 1st Canadian Mounted Rifles from August, 1916 to October, 1918, holding the rank of major. Mentioned in despatches several times, he was awarded the Distinguished Service Order. Col. Taylor's first venture into provincial politics was in 1915. Defeating John W. Ryan, he was elected mayor of Portage la Prairie. He returned to the fight on his own initiative. In 1917 he was elected to the general election of 1922. He was re-elected at the general election of 1926. In 1927 he became leader of the Conservative party in Manitoba. He has been addressing meetings and laying the foundation for his final assault on the government.

Born at Meadow Lea, Man., Col. Taylor was the youngest son of a large pioneer family. His parents came to the province in 1872, settling in Ontario. He is now 54 years old. The Conservative Party was called to the bar in 1910. He has always professed to be a Conservative. In 1910 he married Miss Mabel Agnes Dryden, B.C. on the way he has taken an active part in veterans' organizations. He was president of the Army and Navy Veterans of Canada in 1920-21.

"Fair, Cool" Is Forecast At Week-end

Prospects for weather over the week-end are "fair and cool," according to the forecast of the Winnipeg meteorologist. Quicker than it has been making it is cool in the past 24 hours. Mrs. Owen reported that a "fiddle-bone" wind westerly, a wind was in place. A slight rainfall was expected Friday. It commenced at 12:45 p.m. but amounted to only .51 inch. The highest temperature yesterday was 61 degrees, recorded at four p.m. Nine midnight Friday the lowest point was 45 degrees, as at six a.m. Saturday morning a rising barometer registered 30.4 inches of mercury.

WINNIPEG WARM. WINNIPEG, May 14.—Winipeg sweltered Friday afternoon in the hottest weather of the year. Temperature climbed to 62 degrees at mid-afternoon after holding steady for several hours over the 50-degree mark. It was excessively warm throughout the day.

No doubt the simple life has points to recommend it. Out in the Berkies County the sheepskin, which is considered a "tax collector" in Kansas Gazette.

Messiah Heads For U.S.

Shir Meir Beka who says miracles are child's play to him, confounds western world with materialism. Here he is in London as he is announced that he would not perform miracles in England.

but might do so when he reached the United States. He is also to make a revolution in the world to lead the world to new faith. He has not spoken for seven years. He "talks" by signs and words on an "alphabet board" with his finger.

DAUGHTER OF DR. E. ALLIN DIE ON FRIDAY

Fate Lays Hand on Noted Edmonton Physician and Surgeon

Fate on Friday laid a heavy hand upon Dr. Edgar W. Allin, prominent Edmonton physician and surgeon, and vice-president of the Commercial Life Assurance company, when his wife died suddenly of a stroke at 5 a.m. and his daughter Miss Lella Allin, 23, succumbed to an illness about midnight.

Miss Allin had been seriously ill for the last fortnight, and it is believed that the strain and shock of losing too much for Mrs. Allin to withstand.

GETS PHONE MESSAGE

Mrs. Allin's community had been well during the day and had prepared Dr. Allin's office, and he returned to his home, and about 4 p.m. the nurse attending Miss Allin phoned him, informing him that she had been called to the house. He hurriedly put on his hat and coat, and as he was leaving the office the nurse phoned him to state that she believed Mrs. Allin was dead.

Mrs. Allin was born in England and was a graduate of the University of Toronto. She met Dr. Allin, when he was a young Canadian physician, while he was taking postgraduate work in a London hospital. Their marriage coupled a romantic union in the hospital.

Miss Allin had been a prominent member of the younger set, popular with all the know.

A double funeral will be held on Tuesday. Mrs. Allin is survived by her husband, one son, Dr. Eardley Allin, and two daughters, Miss Lella Allin and Miss Mary Allin, three sisters, Mrs. Thomas Hird and Mrs. T. B. Mortimer of the city and Mrs. W. Elton of Wexford, England and one brother, Harry Kemble in England.

Howard and McElroy are in charge of funeral arrangements. Death was to be seen. A sheet covered the rest.

As though stealing him, Lindbergh said: "Take that off."

The covering was removed. He stood up, and the room was empty.

Half an hour, and the ordeal was over. The body was taken to Trenton to London for cremation.

Police authorities remonstrated mildly. They felt that further examination might provide some clue to the killer. Col. Lindbergh, however, was insistent that cremation be carried out. He said he was respected, as they have been March 2, when the child was kidnapped from his crib in the Saurland home.

The illness of Mrs. Lindbergh followed her recent to her old home. An insurance salesman of doubtful repute had been taken from her. Two months of exposure to spring rain had been her lot.

It was not a pleasant story to tell. The body of the child was found too much for her to stand in her condition.

Action of the physician in ordering Mrs. Lindbergh to bed was said to imply that her condition was in any sense serious. It was, rather, a precautionary measure.

Mrs. Lindbergh, nor her husband, had been in the city in the days of the search for the child.

"Meet me at the Bay"

of steel, many millions pounds of copper.

It would involve more than 100 electric passenger locomotives and much other equipment. Since the U.S. government has the money to build it, it is not practical, what is?

The Republican party went in Ohio, and now that Grand Old Machine is trying to go west in New York. The Republican county committee was expected to advocate a plank in the national platform demanding repeal of the Eighteenth Amendment.

However, the country will know how they were rich and now when it bears next November from the millions of voters throughout the country that never saw New York.

Two Americans who once thought they were rich and now when they are not, were asking each other: "Where would you advise me to put a little money to do perfectly safe in case everything goes to pieces here?"

Gen. William Mitchell, who is in the group said: "The best place to leave your money in the United States is in the hands of a man in France, best organized country in the world."

The French have power to resist any attack from the outside, power to suppress any insurrection from inside. They are powerful in the air, powerful on land, powerful on sea, powerful under the water, and especially powerful in their eyes.

They have a great empire in Africa, in which they can send their surplus production. That's the country that is solid."

Very able nation, the French. We know it to the extent of four billions.

Yesterday London cut the bank rate to 2½ per cent, cheaper money with one exception in the world. It is the only one of the best minds explain a revival of this property, accompanied by England's departure from the gold standard. That seems likely to go to heaven after having taken to the air.

Why not go the whole way, and adopt the \$5,000,000,000 gold standard? It is not a time to be in a hurry. It is a time to be in a hurry. It is a time to be in a hurry.

Why not go the whole way, and adopt the \$5,000,000,000 gold standard? It is not a time to be in a hurry. It is a time to be in a hurry. It is a time to be in a hurry.

Slam has left the gold bands also. What is good enough for England is good enough for her.

A horse called "Ed" died yesterday, owned by E. B. Squibb and Sons. You never heard of him, race tracks never saw him. He lived and died in his stable, supplying serum to prevent diphtheria, enough to protect 40,000 children. Perhaps he will have in the haven for horses a good place as that reserved for Alexander's grandiose Napoleon, Mohammed's milk-white Albion, or the chivalrous Rosinante.

They also serve who only stand and wait."

ANNE LINDBERGH

CONTINUED FROM PAGE ONE

justice the murderer of Charles Lindbergh, Jr.

One was a colonel of the Great War. He was Col. Henry Breckinridge, counsel, friend and advisor of Col. Lindbergh.

The third was Colonel Lindbergh himself—one eagle, and king of the skyward, silver wings and a nerve which could conquer the black void of night in a frail aeroplane, who dared the airplanes from north America to Japan but who found himself a helpless victim of murder, came to his Saurland home.

A few hours earlier Colonel Lindbergh had lusted the very dregs of bitterness when he looked upon the body and added his verification of previous intuition. It was as horrible an experience as could come to any parent.

The mother must have been Charles Lindbergh's moment of anguish. As he entered the room where the body lay just as it had been found late the afternoon before, buried hastily under leaves and brush not five miles from the Lindbergh home, one Colonel was asked:

Col. Lindbergh, do you positively know this baby?"

The aviator stood mute. Only the head—the head which had been struck a terrific blow, caused a fainting fit.

THE EDMONTON BULLETIN STAMP COLLECTORS CLUB

FOUNDED 1929

Conducted by PHIL A. TELY
THIS CLUB IS CHAPTER No. 1 of the ALBERTA PROVINCIAL PHILATELIST SOCIETY and CHAPTER No. 1 of the ALBERTA PHILATELIST SOCIETY (an International Organization).

Knowing that stamp collecting is the hobby of hundreds of our readers, the Bulletin undertakes to publish a list of stamps for sale, and an expert, who will be pleased to help with your problems. Any collector is invited to send in his list of stamps for sale, and to have them addressed, stamped envelope whenever you write the club director and send a terrific blow, caused a fainting fit.

State your age, the approximate number of stamps in your collection and the kind of stamps you are looking for. Send in your list of stamps for sale, and an expert, who will be pleased to help with your problems. Any collector is invited to send in his list of stamps for sale, and to have them addressed, stamped envelope whenever you write the club director and send a terrific blow, caused a fainting fit.

Club Notes

No. 133: 14th May, 1932.

Members to date, 745.

AIR MAIL STAMPS

Canada: Klondike Airway.

The transport that is the most attractive stamp picture today has been issued by the Canadian government.

and Dawson in the Yukon Territory and carried mail between these

points for the first time in November, 1932. The flown covers are scarce.

Only 5,000 stamps were issued, routed in vertical strips of four stamps, and they were placed on sale at four October, 1932. Two shades of blue are found in the set, apparently two printings. The light blue is the more scarce.

The Morgan catalogue of Canadian airmail stamps and covers prices that dark shade at one dollar and the light shade at one dollar and four cents.

Like other stamps of this class, these are now scarce and it will not be long before they are extremely scarce.

They are now scarce and it will not be long before they are extremely scarce.

They are now scarce and it will not be long before they are extremely scarce.

They are now scarce and it will not be long before they are extremely scarce.

"Wait on the Lord, be of good courage, and He shall strengthen thine heart."

—Psalm 37:14.

IF IT WILL HELP ALBERTA THE EDMONTON BULLETIN IS FOR IT

SATURDAY, MAY 14

RESPONSIBILITY GOES WITH POWER

Parliament, without a recorded vote, rejected a motion to continue the five-cent bonus on exported wheat.

This may not mean that the bonus will not be paid. Under the "black cheque" legislation the Government will have power to renew the bonus as a measure of farm relief if prices continue on a low level.

The members of parliament evidently felt that as the Ministers are taking the power to themselves they should also take the responsibility of saying whether and under what circumstances the bonus is to be re-established.

MAKE THEM SUPPORT THEMSELVES

British Columbia and the Dominion are facing the prospect of having to pay \$300,000 to prosecute and maintain the law against robbing sons and daughters of freedom who have been rounded up at Nelson.

The settlement of the issue will be cheap at the price. Proper enforcement of the law is always cheap at whatever it costs. And the plain conclusion from their record is that the sooner these demented beings are taught to obey the law the less the teaching will cost.

Perhaps the amount involved in this single instance will help to attract attention upon the absurdity of supporting people at the public expense when they are put in jail for lawlessness. They are robbing their living when they are locked up; not given free board and lodging at the expense of law-abiding people.

JAPAN STEPS OUT

Tokio says it is withdrawing its troops from Shanghai because it has found that world opinion does not approve its operations there.

The discovery seems curiously late. World opinion has been taking shape for some time and substantially the same before the city had been bombed and thousands of people killed.

In withdrawing, Japan presents Great Britain, the United States and Italy with the responsibility of seeing that the Chinese do not "commit any act of transgression," against what or whom the despots do not say.

This is a legacy bequeathed to the world by Japan's lying. Having created a situation infinitely worse than that it undertook to remedy, Japan stands before the world with the powers it is their business to right matters.

The powers will need both tact and firmness if they are to keep the Chinese from expressing their feelings in something worse than a boycott of Japanese goods.

THE CITY CANNOT DO IT

Mr. McKee, of the relief department, has supplied the city council, on request, with a scheme to establish farms which unemployed people could cultivate and thus make a living for themselves.

The plan involves purchase of some fifteen sections of land near the city, and providing the necessary buildings, stock and implements. It is estimated that 1500 men could find employment on the farms. The initial cost is placed at \$750,000.

Obviously the city cannot undertake a scheme of that magnitude. It hasn't the money. And if it had the money the taxpayers would object, quite properly, to the city undertaking to run farms or other enterprises outside its own boundaries.

If anything is to come of the proposal it will have to be adopted by the Provincial or Dominion Government, whose authority holds outside the city, and whose responsibility for dealing with unemployment is also general.

WILL PARLIAMENT BREAK FAITH?

Parliament without a dissenting voice accepted the report of the Morand committee which investigated the "black cheque" law. The Government gave notice of a bill to create the necessary machinery and get the proposed scheme under way.

Both parliament and Government are thus committed beyond recall to the principle that breadstamping should be made a national service, on the plan laid down by the committee's report. There is no escaping the implication that both are also pledged to the passing of the bill at the present session and to the prompt appointment of the commission.

The committee was not created to prescribe a radio policy for the dim and distant future, but for the immediate future. Parliament is already more than two years behind in dealing with this question. Should the members listen to the interested lobbyists who are pleading for further delay, they will be breaking faith with

the public, and doing so in the face of definite and certain knowledge of what the public want and expect.

THE PRELIMINARIES

The Provincial Government is to set up a committee to study the banking law and banking system. This view is a view to making any recommendations that may seem appropriate when parliament undertakes the revision of the Bank Act a year hence.

Premier Bennett some time ago stated that a federal commission will also be appointed for a like purpose, and to make an enquiry into the whole "money" question.

Some of these provinces are fairly likely to follow the lead of Alberta and do some investigating on their own account.

The investigators will not lack material to consider. The "money" question and all phases of it are subjects of keen interest just now. At a rough guess there must have been a thousand theories published advanced during the last year as to what ought to be done about money and the banks, particularly the banks.

It seems clear enough that if parliament were to start now to revise the Bank Act it would not want for advisers, official and unofficial, as to how to go about the job. The other clear point is that parliament could not possibly do all that the advisers would want it to do.

Perhaps some preliminary investigations will do something to weed out the free ideas and establish some consensus of opinion as to what really requires to be done, or whether anything in the way of fundamental change is required, either in the production of money or the functioning of the banks.

Forty Years Ago

From the Files of the Edmonton Bulletin

Detroit, Free Press.—There are twenty built towns in Kansas without a single inhabitant to awaken the echoes of their deserted streets. Saratoga has a \$20,000 opera house, a large brick hotel, a \$20,000 school house and a number of small business houses, yet there is nobody even to claim a place to sleep. At Topeka a \$20,000 school house stands on the site of a life of a monument to the bonding curve. A herder and his family constitute the sole population of what was once an incorporated city. Kansas is a land of such things, advertised themselves as phenomenal boom cities. For a while everything was lovely and the "goose hung high" but at last dry rot took hold on the boom cities and they are now deserted.

Lord Salisbury and the U.S. minister, Lincoln, signed the Behring Sea treaty.

The village of Fairville, Newfoundland, was burned, 60 families were left homeless.

Lafayette, Kentucky and Co., have filed a contra account against the government for \$111,000.

The Regina police barracks have been made a jail for continuing prisoners from any part of the Northwest Territories.

G. A. Watson returned from Minneapolis on Monday.

Stadium post office was opened last week. Mr. Johnston presided.

S. D. Mulkin and C. Fowler left Wednesday for the Yukon.

THIRTY YEARS AGO

Prince Albert—Grading on the CNR line in the Moffett district will begin shortly, and the line created by the subject was left today.

J. W. Shera and Gus Dose are candidates in the Victoria constituency in the Territorial elections.

Ottawa—Parliament voted \$400,000 to meet the expense of sending a Canadian troop contingent to London to attend the coronation ceremony.

London—British shipping clerks are alarmed at the prospect of a new steamship combine under control of American financiers. It is even held that the security of Britain is threatened by the passing of a large number of ships into foreign control.

TWENTY YEARS AGO

Toronto—Dr. Beattie Nesbitt was returned to Toronto to stand trial on charges arising out of the failure of the Farmers' Loan and Trust.

Venice—The campanile stands today, ten years after its collapse, a complete replica of its former self.

Edmonton failed to sleep last night. The reason was that the Hudson's Bay Co. are placing 1,500 lots of the reserve on the market this morning.

London—Lafayette Tupper died yesterday.

TEN YEARS AGO

Ottawa—The principle of official hog grading in Canada has been approved and machinery is being created to carry the plan into effect.

Manila—The Prince of Wales, with blackened eyes and a bandaged forehead, lunched with Governor General Leonard A. Wood. The Prince was struck by a polo ball.

The Dominion Government is insisting that the city must return to the Government the entire new wing of the Royal Alexandra hospital, together with additional accommodation in the main building.

Viewpoint

By EDGAR A. GUEST

We built this life with eyes and ears. And that machine there was made to see. And each with either hopes or fears. Closer whatever he may find.

Upon great streams of printer's ink. The thoughts of many mortals flow. And as they see and as they think They give us happiness or woe.

One finds the bitterness of strife. With all its anguish, loss and pain. To have a treasure of the heart. To hold all song and mirth in vain.

Another looks about and sees. And may be thought to have suffered much. Giving to common tragedies. A graceful and courageous touch.

Some see the fifth year roses grow. And pass by virtue, sins to find. And some, in spite of hurt and woe, Retain a happier state of mind.

The Passing Show

By J. B. COOPER

One of those serio-comic American divorces that are a joy to preachers and columnists has just been announced from Pittsburgh.

Neither liquor, nor wild parties, nor other vices were mentioned in the case. There was not even a complaint about the cookey quality of the wives.

All four were ardent golfers. Mr. A. found that while Mrs. A. was looking on he couldn't play his best. But when some time ago stated that the ball when Mrs. A. was there to watch.

This phenomena is not new. But in this case Mr. A. couldn't go under the course in par while Mrs. A. was watching his game. When Mrs. A. was the onlooker, he never missed a stroke or a putt.

So each in both couples seeking severance on the grounds of incompatibility of temperament. Now they have re-oriented by the aid of Mexican divorces, with the former Mrs. B. becoming Mrs. A. and the former Mrs. A. becoming Mrs. B.

Both couples are well satisfied. They are going to get together, and each husband and wife now feel they will play their best. Sacrificing their former marriages on the altar of golf, they all profess themselves well pleased with the result.

It all looks ridiculous at first sight, especially to those who like myself have successfully retained all habit-forming practices like liquor, drugs, golf. But perhaps this quartette has made a new discovery more potent for good than the recent splitting of the atom.

The inability to do or be your best under the depressing or restrictive presence of some person is something all sensitive folks feel. Who was ever so with an unfriendly critic looking over his shoulder?

A chief justice of the province that holds the divorce record in Canada feels that though marital infidelity and absence of love are essentials for divorce in Canada, that in the great majority of cases, collusion was obvious.

In all these cases, divorce is granted on the ground of adultery, or real reasons for going to court because they couldn't hit the ball under the eye of each other. The marital offence was committed by bringing their golf to the court, the law, or as in some cases, was actually "faked."

Who hasn't heard personal opinions about the character of persons, acquaintances receiving radically different impressions from the same person? A highly sensitive person is a dozen different people.

It is mean; he is generous. He is happy; he is morose. He is both friendly and hostile to the enthusiasts. He is easy to and impossible to please.

A savage or a clown may be like a pipe through whom one can breathe, but one is obtaining the same note, but a highly sensitized man or woman is like an organ with many notes and infinite possibilities for harmony or disharmony. It depends on who plays the keys.

Perhaps these folk have hit upon the one sure test for matrimonial fitness. If so, there will be a big demand for golf clubs. I may even break my own resolution.

How much more pleasant a way it will be to choose a good mate by playing a few rounds of golf than by the only other method, to find out whether a good wife may have heard too fast and gray, and blindfold grab the first woman you meet.

There is no enchantment on earth quite like the enchantment of Padewski's music.

Lido grows richer and sweeter when Padewski plays. Yet Padewski is more than a musician. Statesmen, artists, philosophers, he is one of the great souls of this age.

The tour of America which he is making in his private car, on board of which he lives and works, is a tour of education, of enlightenment, of enlightenment.

At the age of three, Padewski's Polish home was burned, and his father led away by Cosack troops as a prisoner.

At thirteen, Padewski was sent out into the world to make his own livelihood.

At seventeen he was a teacher of music at Warsaw. At twenty he was a pianist in the city of St. Petersburg.

At nineteen he married. Together the two boy-men suffered want. A year later, his young wife died, leaving him an invalid son to whom Padewski devoted his life. His famous "Minute" he sold, through poverty, for a sum of fifty dollars.

At twenty-nine he played in London for the first time, for a small fee, to become recognized as an artist. Next year he received a thousand pounds for a single concert. With vast bitterness and vain regret he must have greeted prosperity.

But the greatness of Padewski lies not only in what he can do, but in what he is. He did not refuse to go on. Instead he told them to sit aside enough to pay their bills, and each take \$100 for his expenses. Padewski's confidence in himself with taking whatever was left over.

Now the pianist is travelling through the States as minister-plenipotentiary at large for Poland, and the poor underprivileged accident of the republic.

The president of the United States can bear witness to the humanity and kindness of the great pianist. Withal, however, is a man of iron.

In London, working his way through university, he and another undergraduate conceived the idea of making some money as local improvisers on the Irish harp.

Came the night of the concert and the two young concert promoters had nowhere near the \$2000 for the tickets and there were no prospects to be met.

Padewski's heart of his plight. He didn't refuse to go on. Instead he told them to sit aside enough to pay their bills, and each take \$100 for his expenses. Padewski's confidence in himself with taking whatever was left over.

Now the pianist is travelling through the States as minister-plenipotentiary at large for Poland, and the poor underprivileged accident of the republic.

The public has no need to regard an artist as any other than a creature of the gods.

He may be as unconventional as Burns or Shakespeare, Byron or Keats. His offering to the world is his art, not his private life. Balbette and dwellers on Main Street cannot be the critics of dwellers in Bohemia, or understand the lives and emotions of these children of genius. As the poet says:

Genius is madness in real earnest. But this perturbation of the powers divine. How splendid it is when the great artist is also a great, sweet, noble character?

Padewski is one of those.

Health and Diet Advice

By DR. FRANK MCCOY

MORE FOOD AND MORE EXERCISE

The processes of elimination should now be well established for all of those who started this Spring Diet Course. We had at first two days of acid fruit diet and you are now on the third day of the non-starchy vegetable diet which should be continued for two days more, making the elimination period last seven days.

Many of you have undoubtedly noticed an improvement in your health by this time. This is because your diet is simple and easy to digest, and by interfering with the digestive processes by using the usual bad combinations. You have also been increasing the elimination of toxins through the eliminative organs. A few of you may feel a little weak and out of sorts but this is simply because your organs have not yet eliminated a sufficient amount of impurities. Have the courage to stick to the diet for a few days longer so that the elimination may proceed.

After two more days of the non-starchy vegetables, also using the enemata, steam baths, deep breathing, etc., you will start feeling better. It is well to remember that a cure is but a temporary change and that it cannot be permanent, whether it is brought about by a special diet or by any other means, unless you are constantly on the alert to correct your every-day habits of eating, exercising and thinking. Now is your time to build into your mind these health habits. Once you begin to return to a general diet it is advisable to begin taking some kind of vigorous physical culture exercise. I would suggest that you use the exercises of the morning and evening and take at least one long walk some time during the day, possibly late in the afternoon or before retiring. The walks should be gradually increased until you are able to walk four or five miles without fatigue. Walking is necessary for building endurance and you should use it unless you are so weak that you are unable to carry on. When you have to walk a long distance, use your work. Such games as basketball, baseball, golfing, wrestling, etc., which produce heavy breathing and thinking. Now is your time to build into your mind these health habits. Once you begin to return to a general diet it is advisable to begin taking some kind of vigorous physical culture exercise. ambition and selfishness with consciousness of something better to which he had not yet yielded his life, would account for the dream. Jacob evidently had suppressed something finer in

In the dream at Bethel Jacob had a vision of God. The one may quibble about that state and suggest that Jacob had not a very high conception of God, it was more a tribal deity,

whom he conversed. But the one who came to Jacob in his dream represented the noblest being whom he could conceive; and it is that which is to be the experience of each one of us.

Following the dream came reality. Jacob awakened out of his sleep a new and a better man. He is not the first man whose life has been changed through the power of a dream becoming true.

Peterborough, May 14.—Peterborough and Belleville presbyteries taking the lead in the Bay of Quinte Conference of the United Church of Canada in arranging for leaflet conferences on Dominion and world service. Every pastoral charge in the Peterborough presbytery

have a conference on amia methods of work in the next weeks, according to Rev. R. F. S. man, Norwood. The Belleville bytery has already held succe conferences in four centres Prince Edward county with John Coburn, D.D., of Toronto.

About one-fifth, or 2,000,000 a of Florida, is composed of rivers, streams and lakes.

Costume Party to Honor Little Theatre Actors

Country Club Will be Setting for Gay Masquerade on Saturday Evening for Helpers in Five Productions of Season

Those who have portrayed various interesting roles throughout the year in Edmonton Little Theatre productions will have the opportunity to have their choice of character parts in a costume party to be given at the Country Club on Saturday evening, May 21. Masks will be in order, it was decided at the one meeting Friday afternoon at the residence of Mrs. C. J. Biggs. The guests will include all those who have taken part in any of the five productions presented throughout the year, as well as those who have assisted with stage settings in other ways.

Among those who have been invited are: Lois Osborne, Helen Chalmers, Larry Davis, Cecil Berry.

Miss A. Tompkins New President of Women Teachers

Annual Meeting Follows Banquet in Hudsonia

Friday

Miss Alice Tompkins was elected president of the Edmonton Women Teachers Association at the annual meeting and banquet in the Hudsonia Bay on Friday evening. Other officers for the coming year are: Vice-president, Miss Lyle; Secretary, Miss Josephine; Treasurer, Miss Bruce; District representative, Miss Evans; Miss Brown, Miss Burns, Miss Berry, Miss Curwell and Miss B. Williams.

Miss Florence Hall, retiring president, acted as chairman. About sixty members were in attendance and following dinner Miss Beattie Ely sang delightfully, accompanied by Miss Beattie Campbell, Mr. G. McKee, superintendent of schools gave a very fine address, "Down the Centuries of Time," in which he explained the present situation of the political, religious and social and educational events of the past.

Miss McDermid, exchange teacher from Quebec, who was a guest of honor at the affair, was made the recipient of a Saskatchewan Teachers' gold pin.

Other guests of honor were Mrs. and Mrs. McKee, Mrs. W. D. Ferns and Mrs. Yule.

GREEN LEAVES

It is always of considerable interest to hear that the world outside is showing its appreciation of those who have come to know and appreciate at home. When Mr. A. C. Leighton, R.B.A., was in Edmonton last night, he was the guest of the club which he had just returned from his tour of the world.

Mr. and Mrs. W. T. Tait entertained at their home, 1197 1/2 street, in King's Way, a party of about thirty, recently. The decorative scheme was carried out in pink and white. Stagnation and glassy plates centred the table on which the bride's cake rested. The evening was spent at cards, honors going to Miss Margaret Hughes, Mrs. Griffith, Mr. Maxwell and Mr. Griffith.

Mrs. Brett made the presentation to the bride-elect of a beautiful suit.

IN AND OUT OF TOWN

THE GRADUATION BALL at the university on Friday evening, although it marked the end of a busy season, was a most successful one. The dances, marked two first appearances of a number of smart young men with charming dash and verve by many of the students' most promising debutants.

Mrs. William Oriebeach entertained at her home, 1197 1/2 street, at her residence in Glenora on Friday evening. Twenty members of the Edmonton Club were present, and the evening was a most successful one.

Mr. Donald Johnson, who is now in the city, was the guest of Mrs. and Mr. Johnson at their home, 1197 1/2 street, at her residence in Glenora on Friday evening.

The many friends made by Dr. Johnson, who is now in the city, were the guests of Mrs. and Mr. Johnson at their home, 1197 1/2 street, at her residence in Glenora on Friday evening.

Miss Catherine Hall has returned from her home in Winnipeg after spending a few weeks in the city.

Mr. and Mrs. G. W. Dwyer have returned from their home in Winnipeg after spending a few weeks in the city.

Professor and Mrs. Menden Long have returned from their home in Winnipeg after spending a few weeks in the city.

Miss Betty and Miss Frances Wilson entertained members of the Edmonton Club at their home, 1197 1/2 street, at her residence in Glenora on Friday evening.

Honoring Mrs. W. J. Pratt, who is now in the city, was the guest of Mrs. and Mr. Johnson at their home, 1197 1/2 street, at her residence in Glenora on Friday evening.

Mr. and Mrs. W. J. Pratt, who is now in the city, was the guest of Mrs. and Mr. Johnson at their home, 1197 1/2 street, at her residence in Glenora on Friday evening.

Mr. and Mrs. W. J. Pratt, who is now in the city, was the guest of Mrs. and Mr. Johnson at their home, 1197 1/2 street, at her residence in Glenora on Friday evening.

Mr. and Mrs. W. J. Pratt, who is now in the city, was the guest of Mrs. and Mr. Johnson at their home, 1197 1/2 street, at her residence in Glenora on Friday evening.

NEW FORDS HERE SOON

The new Fords are produced in four- and eight-cylinder models, one chassis accommodating either engine. The new cars have synchronous gear shift, down draft carburetor, automatic spark control, new valves, and entirely new body lines. We picture the new Victoria edition.

SOME TIPS ON SAFE DRIVING

Commonsense Will Prevent Almost All Accidents

DETROIT, Mich., May 14.—Fully 99 per cent of all motor car accidents could be prevented if drivers would exercise their common sense and proper caution.

This is the belief of Russell Snowberger, prominent racing driver and a serious contender for championship honors in 1932. "Every time I ride with someone else, I watch his hands on the steering wheel, his feet on the floor and

the position in which he sits," says Snowberger. "When a driver grabs the wheel at the bottom, steers nervously from side to side or drives with one hand, I wonder what he would do if something happened suddenly. If he spreads his feet carelessly on the floor, crosses his legs as I've often seen them do, I'm pretty certain he's not going to pay much attention to his driving. And if he slumps down in his seat I know he won't pay much attention to business."

Racing drivers are generally regarded as a careless lot of dare-devils," says Snowberger, who will drive a Hupp Coupe in the year's 500 mile race at Indianapolis on May 30. "But they're not careless. The minute a race driver's hands touch the wheel he has time for just one thing—driving. Since race drivers take chances, that's part of their job. But they don't take them foolishly. Race drivers don't hog the road or drive with one hand on the wheel and the other about a companion. There are enough hazards on the track. So the race driver doesn't create others on the open road."

Snowberger thus describes what he considers the essentials of good driving. Every driver should sit erect in the car, with his hands on the steering wheel. The feet should be kept so that they can be moved quickly to the foot pedals. Keep your hand on the rim and not on the spokes in what might be called the 11 o'clock position for the left and the 4 o'clock position for the right. Use the entire hand, with the thumb on the inside of the rim and the fingers extending outward and around it. Don't keep your muscles tight; for that quickly tire you when driving. Instead, relax your arms and legs and try to sit comfortably in the seat. Make your movements smoothly and easily. Try to get more enjoyment out of your driving.

In thousands of miles of racing and road driving I have taught myself to avoid a number of dangerous driving positions and steering wheel grip—and to make good driving as effortless as possible.

These in brief are the recommendations made to every driver by this nationally known racing pilot who believes "Every time the road should always demand the undivided and undisturbed attention of the driver."

NON-DRIVING DRIVERS
A union of non-driving chauffeurs has been formed in Hamburg, Germany. It was organized after the information was leaked that half of the 5,000 fatal accidents recorded in Germany annually were due to drunken drivers.

How's She Hittin'

By JAMES F. DONAHUE
The engine isn't the only unit of a car that makes for smooth riding. It may be operating perfectly, and yet the car may be hard to drive. The answer to this can be generally found in the tires, wheels, springs and frame.

The entire problem can be laid at the feet of the driver—himself. The average motorist is more or less careless about the care of his engine, but he seldom neglects other parts of matters in themselves, but left to him. These parts are generally small but which make for easier driving, accumulate trouble, they generally result in uncomfortable riding and danger.

Tires and their care should be a major consideration of all motorists. The new kit should contain a tire gauge, which should be used at least once a week to check pressure of each tire. This pressure should be that recommended by the manufacturer.

Constant tire pressure is advised by car and tire builders to insure longer life for the tires, comfort in riding, and ease in steering. Punctures are said to be less possible when the tires are run under their stipulated pressure.

If a tire is inflated by guesswork, it is more likely to be filled with more air than needed. A kick of the foot is no way to judge tire pressure. It must be determined by a gauge. If tires have too much air in them, their walls are apt to puncture and blow out when they strike a sharp stone or curb.

If underinflated, tires will make steering difficult, result in shimmying at high speeds, and thus endanger occupants of the car. If dangerously inflated, the car will ride and sleep unevenly.

Wheels should be checked regularly for alignment, not only for safety of occupants, but for economy gained from proper alignment. Often the severe shock of hitting a deep rut in the road will serve to throw the wheels out of line.

This condition causes undue wear on the tires and is especially hard on wheel bearings, causing them to wear out more quickly and necessitating a "re-bushing" job.

Wheels, therefore, should be tightened up and aligned regularly.

It is important to check various points about the chassis be lubricated

"AIRWHEEL" FOR AUTOS!

The fast and snappy "airwheel" already used on airplane landing gear, soon may take the place of the balloon tire in automobiles. The new tire has an inside diameter of 15 inches and an outside prevailing 19 inches for balloons, while its pressure is kept at 12 and 15 pounds. It is said to produce much easier riding. The tire, shown here installed, with a standard balloon alongside to show the contrast, is being produced by Goodyear Tires.

New Finer 1932 Plymouth 4-Door Sedan

Above is shown the new 1932 Plymouth four-door Sedan. Wheelbase of 112-45 h.p. Flattop Power Motor, Safety Steel Body, Free Wheeling and Automatic Clutch are among the outstanding features.

Auto Shows

Are Popular

Spring salons have been very successful in most cities throughout Canada. Backward weather has given additional importance to the salons held in March, which is fairly late in the season for the so-called "Spring Showings." Among the most recent salons staged by General Motors Products of Canada, Limited, was the one at London, Ont., where 12,000 people visited the display in the Hotel London in a single week. Actual sales were very good and the prospect list well filled.

Regularly greasing the chassis and springs results not only in easier riding but helps lengthen the life of the car. A rusty, unattended chassis is dangerous. An important part may break while the car is going at high speed and cause the car to swerve to destruction.

Spring steel especially should be kept well lubricated. These often "freeze" or stick from lack of grease, and crystallize and break. Let the car take a severe bump at considerable speed, and the axle may break and endanger lives of the occupants.

The chassis, too, should be checked for alignment. Often, after an accident, the frame is knocked out of true. This results in uneven tire wear and strains on all parts of the car.

Keep the springs well lubricated. Fine watch springs are kept oiled, and, although on a much larger scale, automobile springs will work a lot better if free from constant friction caused by the lack of oil.

AN INTERESTING FORD EXHIBIT

Dominion Motors Showing Cutoaway Mechanism of New Ford

There is a very interesting cutoaway exhibit of the new Ford engine, differential, transmission, steering column and brakes. The engine that is on display is hooked up to heavy batteries and can be operated at any desired speed—and every working part of the engine is open to the fullest inspection.

The differential, transmission and the other parts of the new car are displayed in a very simple and effective way—and need to say the exhibit is attracting plenty of attention.

Radio Gives Orders To Car

An interesting demonstration controlling the operation of an automobile by radio was given at noon of the General Motors show this spring. The apparatus consisted of a radio operating set on the running board of a Chevrolet, and a transmitter some distance away. A telegraph key on the transmitting set gave "orders" to the receiving set on the Chevrolet. The transmitter set high corresponding to a similar antennae on the car, the latter be-

ing connected with the controls. The program included starting and stopping the car, turning lights on and off, and sounding the horn.

WORLD AUTO TOTAL
The world total of motor vehicles at the end of 1931 is set at 33,441,803. Senate soon.

GOOD YEAR PRIZE CONTEST

\$3,000.00 CASH

1st prize—\$1,000.00 cash
2nd prize—\$500.00 cash
3rd prize—\$200.00 cash
4th prize—\$100.00 cash
5 prizes, each \$50.00 cash
95 prizes, each \$10.00 cash
104 prizes totalling \$3,000.00

Someone is going to walk home with that \$1,000.00 for just estimating the number of coins in the average Goodyear Tire. Why don't you take a few minutes to make an estimate? It won't cost you a cent and you have as good a chance as anyone else to be one of the winners.

Closing date June 30, 1932. Address: "The Goodyear Super Twist Cord Contest," New Toronto, Toronto 14, Ontario.

Come in and see Super Twist Cords demonstrated and get a helpful booklet of contest directions.

One-Eyed Car Is A Menace

How often does the night driver not find the temptation that he is approaching an oncoming motor vehicle with only one eye? It is a temptation that is a menace. It is a menace that is a menace. It is a menace that is a menace.

COSTLY DRIVING
Property loss in California law suit, due to automobile accident, caused by careless driving, is said to exceed \$100,000.00.

AND STILL GOING UP
The number of filling stations in the United States is estimated at 30,000.

Japanese are said to be the greatest motor addicts in the world. A show of that country's road map, for instance, would be a good thing.

OUR GOOD WORK!

"It's wise to choose this Six"

ONCE you really study the Chevrolet Six, you'll know immediately why so many motorists are saying "It's wiser than ever to choose this Six." Study the engine, for example. Long ago Chevrolet pioneered the six-cylinder engine in the low price field because this type of power plant strikes a perfect balance of smooth performance and maximum economy. It is a fact that the Chevrolet Six costs less for gasoline, oil and upkeep than any other full-size car! In addition, the Chevrolet Six gives you more actual horsepower in the normal driving range—balanced power, for quick acceleration and effortless speed. And this six-cylinder engine has been proved reliable by more than 2,000,000 owners in billions of miles of driving.

Along with its famous performance record, Chevrolet offers you exclusive features. Smart Fisher Bodies, with roomy interiors that invite you to stretch your legs and really relax! Silent Synchromesh gear shifting plus Free Wheeling—to mention only two! Ask your friends about the Chevrolet Six; come to our showrooms and drive it. Remember, you can have immediate delivery of any Chevrolet model—at new, reduced prices—and on easy monthly payment terms.
